

DANIEL OLUWATOYIN ANIFOWOSHE

SOFTWARE DEVELOPER, DATA ANALYST

ABOUT ME

I am a first-class graduate that specialize in software development and data analysis. With expertise in both front-end and back-end development using the MERN stack for full stack applications, C# for backend, and react-native for mobile development as well as data analysis and visualization using Python, I create comprehensive software solutions driven by data insights. I also create static website with WordPress. My approach combines technical precision with analytical thinking to deliver impactful results that solve real-world problems.
